Can you help us set up a tenant meeting with one of the SLOs and BID Safety. This is not good

- \_\_\_\_\_

Hi Bob, this is Liliana from apt #309 I'm really concerned about the security in this building within these two last weeks there has already been two incidents the incident two weeks ago was two homeless people sleeping in the laundry room, my son decided to call south park to come get them out and they threatened my son and his friends that they knew what they looked like and that they were going to come back and so they did come back and were waiting downstairs. Then yesterday at 12:45am there was a guy African American guy who was trying to come inside he was hiding right where the intercom is and that's a blind spot if you're walking out he then started kicking the door and wall and shaking the door really trying to break in. We should do something to improve the security of this building . We are the only building without a security and I feel that, that's the reason there has been a lot of incidents of homeless people coming in
